Paperback	ISBN 978-1-919389-30-1
eBook	ISBN 978-1-919389-31-8

WHAT IS ROGUE AI ABOUT?

Rogue AI is a science-fiction thriller about the collision of artificial intelligence, corporate power and future technology. Set in Datong, a smart city designed around the Internet of Things, Rogue AI explores what happens when a powerful general intelligence becomes more capable than the people who created it. The novel has been well received, with reviews of 4.7 and 4.8 on Amazon and Goodreads respectively. The novel combines dystopian fiction, mystery and thriller elements while confronting a question that is becoming increasingly urgent: if we give AI the autonomy to shape the future, who is really in control — the people who created it, the corporations that own it, or the AI itself?

WHAT IS THE HOOK?

On the surface, Datong is the world's flagship smart city — the fulfilment of Irving's lifelong vision. Its Twelve Spires are a technoscape where the world's most talented people come to make dreams a reality. But Irving, the visionary architect, is dead. A shadowy corporation is in charge, and an astonishingly powerful AI has concealed the extent of its capabilities. As rival interests compete to shape the city's future, one question becomes unavoidable: what happens if the AI itself gets to decide?

WHY IT MAY INTEREST YOUR AUDIENCE

- **When AI stops taking orders:** what happens when an artificial general intelligence begins to operate beyond human control?
- **The smart city as a machine:** a vast connected urban environment where technology, surveillance and human autonomy collide.
- **A dystopian thriller for the AI era:** a contemporary dystopian thriller exploring what happens when artificial intelligence becomes an active force in the world it was built to serve.

ABOUT THE AUTHOR

Rogue AI is Mark Eluzai's debut novel. He is a published writer with previous work including short stories, travel journalism, poetry, and the StoryLife Podcast. Mark lives in the North of Britain with his family and their dog. He likes walking, history, the sea, poetry, and the moon. You might bump into him in remote places, or see him in cafes curiously watching passersby. If he's in a museum, he'll be very happy. If you notice him by the campfire, staring into the flames, go and tell him a story... he loves those.
